Virtual Worlds: A First-Hand Account of Market and Society on the Cyberian Frontier

Edward Castronova

Abstract

In March 1999, a small number of Californians discovered a new world called "Norrath", populated by an exotic but industrious people. Having just returned from a dangerous exploratory journey through this new world, I can report a number of interesting findings about its people and economy. About 12,000 people call it their permanent home, although some 60,000 are present there at any given time. The nominal hourly wage is about \$3.42 per hour, and the labors of the people produce a GNP per capita somewhere between that of Russia and Bulgaria. A unit of Norrath's currency is traded on exchange markets at \$0.0107, higher than the Yen and the Lira. The economy is characterized by extreme inequality, yet life there is quite attractive to many. The population is growing rapidly, swollen each each day by hundreds of émigrés from various places around the globe, but especially the United States. Perhaps the most interesting thing about the new world is its location. Norrath is a virtual world that exists entirely on 40 computers in San Diego. The entire dollar-based economy is underground, since the owning company, Sony, considers everything created in the world to be its intellectual property. Unlike many internet ventures, virtual worlds are making money - with annual revenues expected to top \$1.5 billion by 2004 - and if network effects are as powerful here as they have been with other internet innovations, virtual worlds may be the next step in the evolution of internet (and possibly human) culture.

Virtualworldsmayalsobethefutureofe commerce, and perhapsof the internet itself. The game designers who created thriving places like Norrath have unwittingly discovered a much more attractive way to use the internet: through an avatar. The avatar represents the user in the fantasy 3D world, and avatars apparently come to occupy a special place in the hearts of the ircreators. The typical user devotes hundreds of hours (and hundreds of dollars, in some cases) to develop the avatar. The seord in ary people, whose emto have be come bored and frus trated by ordinary we be commerce, engage energetically and enthusiastically in avatar -based on -line markets. Few people are willing to gowe b shopping for tires for the ircrar, buth undreds of thous and sare willing to go virtual shopping for shoes for the ircrar, buth undreds of thous and sare willing to go

Thebusinesspotentialofthisinterestinavatarshoppingisnotlostoneveryone. Mindark,aprivateSwedishcompany,hopestouseavatar -basedshoppingtobuilda

globalnetworkmonopolyininternetinterface. The strategy: startavirtualworl dina game of trulymassives cale, so that millions can use it at any time. Make the game free. Allow peopletouse their credit cards to make transactions. Then waitfor the society and markets to develop, and invite Earth retailers to open 3D stores in the virtual space. At that point, your Lara Croft look alike avatar will be able to follow up her to ugh day of adventuring with arun into the nearby virtual JCP enney -- to buy her own eranews uit, for realmoney. The commercial potential of the new virtual alworlds is impressive, and makes the mwell worth a first look.

Whatfeaturesofthevirtualworldsgivethemthis competitiveedge?Anoverview of the conditions of existence in VWs will provide some obvious answers. To enter a VW, the user is first connected to these rverviate internet. Once the connection is established, the user enters a program that allows them tochooseanavatarfor themselves.InallofthemajorVWs,onecanspentanextraordinarilylongtimeatthis firststage, choosing the appearance of the avatar as well as its abilities. Always wondered whatitisliketobetall?Chooseatallavatar. Wanttobeoneofthesmartpeoplein society?Makeyouravatarabrilliantwizard.Needtogetoutyouraggressions?Give youravatarimmensestrengthandahighskillinwieldingamace. Thinkitwouldbefun tobeabeautifuldark -skinnedwoman?Gofor it.Thesechoicesoccurunderabudget constraint that ensures equality of opportunity in the world: Yourmace -wieldingogre willbedumb, and your brilliantwizard will have a glass jaw. At the same time, the budgetconstraintensuresequalityamongavata rsalongdimensionsthatmostpeople thinkshouldnotmatterforsocialachievement.Inparticular,maleandfemaleavatars have the same initial budget of skills and attributes. A vatars who sephysical characteristics(i.e.skintone,size)areassociated withanybenefitinthegamemust acceptsomecompensating disadvantage. Any inequality in the VW can only be due to oneoftwothings:a)aperson'schoiceswhencreatingtheavatar,orb)theirsubsequent actionsintheVW.

Oncetheavatariscreated,i tisdepositedatsomeplaceintheVW.Becausemost of the laws of Earth science apply, most of the time, it is quite easy to "become" the avatarasy ouperceive the world through its eyes. You cannot run through walls; you can

onlyseewhereyouarelook ing;ifyouareatPointAandwanttogettopointB,youwill havetowalkyouravatarinthatdirection.Ifyoujumpoffaroof,youwillfallandhurt yourself.Whenthesungoesdown,itgetsdarkerandyouwillneedalight.Ifyoudo somethingover andover,youwillgetbetteratit.Ifyouholdthings,youmightdrop them;ifyoudropthem,someoneelsemaypickthemup.Youcangivethingstoanother avatarifyouwish.Youcanhitotheravatarsandbiots.Youcankillthemifyouwish. Andtheyc ankillyou.

OfcoursethenaturallawsofEarthneednotapplyinaworldthatexistsentirely assoftware,andmuchofwhatdefinesanavatar'suniquenessisitsabilitytobendor breaksomeoftheselawsandnotothers.Dependingontheskillschosen, anavatarmight beabletofly,seeformiles,hypnotize,healwounds,teleportthemselves,orshootgreat flamingfireballsatotheravatar'sheads.Againabudgetconstraintapplies:thosewhocan healorhypnotizeoftenhavedifficultysummoningafire ballworthyofmention.Asa result,avatarscometoviewthemselvesasspecializedagents,muchasworkersina developedeconomydo.Theavatar'sskillswilldeterminewhethertheavatarwillbea demanderorsupplierofvariousgoodsandservicesinthe VW.Eachavatardevelopsa socialrole.

Socialrolesaredefinedthroughcommunicationwithotheravatars.Whenan avatarislaunchedintotheVW,itisgrantedalimitedabilitytocommunicatewithother avatars.Thecommunicationisintheformofacli ppedwrittenEnglish("chat"). ¹¹An avatarmayapproachanotheravatar,typeamessageoutonthekeyboard,andsendthat messagetotheotheravatar.DependingonthenatureofthelawsofsoundintheVW,an avatarmayalsobeabletooverheartheconvers ationsofothers,aswellashold

conversationswithavatarshundredsofvirtualmilesaway.Thesecommunicationsallow socialinteractionsthatare *not*asimulationofhumaninteractions;they *are*human interactions,merelyextendedintoanewforum.Asw ithanyhumansociety,itisthrough communicationthattheVWsocietyconfersstatusandstanding.

Asitturnsout, the social standing of the avatar has a powerful effect on the entertainment value of the VW. Having specialized incertain skills, anavat armay find the accomplishment of certain goals much easier with the assistance of an avatar who has a complementary skill. For example: When traveling from AtoB, the monsters must be killed and so skills indestruction are needed; when traveling from B to C, the monsters must be evaded and so skills indeception are needed; when traveling from Ato C, one should form a party consisting of a destroyer and a deceiver, rather than travelal one. An avatar who does not form social relationships on at least an adhoc basis will generally have a more difficult time doing things in the VW. In some VWs, it is a matter of survival – an avatar acting alone will eventually starve or be killed by a biot.

Thesesocial relationships are essential, and they emerge under the same kinds of circumstances as required in Earth societies: two people with complementary abilities or resources have an incentive to engage in mutually beneficial trade. It follows that an avatarmust have skills to do and seem uch in the world. Howe ver, developing the avatar's skills takes time; monsters must be killed, axes must be forged, quests must be completed. The result of all this effort, which can take hundreds of hours, is "avatar capital": an enhancement of the avatar's capabilities throug htraining. In most VWs, capital is given by a number called the "level," so that an avatar avatar avatar avatar avatar avatar avatar by a number called the "level," so that an avatar by a number called the "level," so that an avatar by a number called the "level," so that an avatar avata

koboldsisgivenanincreasetolevel7.Withthatincreasecomesanenhancementofthe avatar'sabilities,whichthenmakestheavataram oreattractivesocialcontact.

Insum, activity in the VW requiressocial integration, but social integration requires activity: the avatar faces the same sort of social rewards ystems as a refound in Earth society. The leveling and integration system also draws on the basic human tendency to getself - esteem from the opinions of others, and the result is that users are powerfully motivated to increase the iravatars' abilities. Like the humans who im bue them, avatars find themselves on something of a tread mi llof social success through avatar capital accumulation: the ymust work to advance, but each advance mentral is esthe aspiration level and spursthem to still greater work (Easterlin, 2001). It is the success and standing of avatar that makes peopled evote hundred softhours to virtual worlds, indeed somany hours that one can almost believe that many peopled olive *there*, where veritis, and not on Earth.

14

r

InaVW, conversely, the user faces constraints on the creation of avatars and, notallavatars are the same: the user faces constraints on the creation of avatars and, through leveling, on the development of the irabilities. An avatar may die, and death may robit of some or all of it spowers. Second, the avatar is constrained by the physicality of the VW in that a large percentage of important goods and services can only be obtained from other avatars or from biots, always a taprice or by risking death. No free lunches. Third, the avatar is constrained by society in the VW, in that social roles are not open to every one; an avatar must compete against other avatars to fill arole. In a sentence, avatars in avatars paces could do now or kand still do any thing that any other avatar could do; avatars in VWs must work to do any thing interesting at all.

And, somewhat shockingly, scarcity is what makes the VW sofun. The process of developing avatar capital seems to invoke exactly the same risk and reward structures in the brain that are inv oked by personal development in reallife. The idea is shocking because its eems to suggest that utility and well -being are not the same thing. Utility always rises when constraints are relaxed, yet people seem to prefer a world with constraints to a without them. ¹⁴ Constraints create the possibility of achievement, and it is the drive to achieve something with the avatar that seems to create an obsessive interest in her well -being. Moreover, since the VW sare inherently social, the achievements are relative: it is not having powerful we apons in the world. In a post industrial society, it is social status, more than anything else, that drives people to work sodiligently all their lives. In this respect, VW sare truly a simulacrum of Earth society.

Buttherulesaredifferentinimportantways,makingVWsmorepopular,for many,thanbothEarthsocietyandtheavatarspacesthatprecededthem.VWsofferthe essentialhuma nstoryofchallenge,maturity,andsuccess,butplayedoutonamorelevel playingfield.Theyofferlifewithanescapeclause,becauseifthingsgowrongandyou cannotwalkortalkandeveryonehatesyou,youcanjuststartover.Andtheygiveyoua freedomthatnoonehasonEarth:thefreedomtobewhomeveryouwanttobe.Already, alargenumberofpeopleseemswillingtopayanongoingmonthlyfeetoenjoythis privilege,andthenumbersaregrowing.Formany,thebestworldisonewithscarcitybut perfectequalityofopportunity.VWsprovidesuchaworldand,asaresult,theyseemto begrowinginimportanceasaforumofhumaninteraction.

IchooseNorrathbecauseitsmothergame,Everquest,istheindustryleaderin termsofsubscriptionsandrevenues. ¹⁷Myattentionwasfirstdrawntothistopicby news articlesinJanuary2001reportingthatdollar -denominatedtradeinNorrathiangoodshad becomesoextensivethatSony,theowningcorporation,hadpressuredauctionsiteslike EbayandYahootoforciblyclosedownanyNorrath -relatedauctionsonthe site (Sandoval,2001). ¹⁸Itseconomyseemsasextensiveastheothereconomies,although UltimaOnlineisalsoextremelywell -developedandhasbeenthesubjectofmedia scrutinyaswell. ¹⁹However,therearemoredollar -basedtradeandcurrencytransaction s involvingNorraththantheotherVWs.

If there were extensive prior research on these VWs, of course, it would be possible to report about the mall. However, it seems that virtually no academic attention has been devoted to VWs to date, judging from as earch of 8 major research data bases covering public affairs (PAIS), economics (Econlit), humanities (Arts and Humanities Search, Humanities Abstracts), sociology (Sociological Abstracts), communications (Com Abstracts), and mainstreammedia (Lexis -Nexis). These arch covered the words

MMORPG,Everquest,UltimaOnline,Asheron'sCall,AnarchyOnline,PersistentState World,andPersistentOnlineWorld.("VirtualWorld"wastoogeneralandyielded thousandsofhits;thoseIexaminedwereallunrelatedtoVWsas understoodhere.)These searchesproduced66hits,allofthemnewspaperandmagazinearticles,manyofthose beingtongue -in-cheek"Everquestwreckedmymarriage"humanintereststories.Inthe end,thereportwillfocusonNorrathonlybecausethereis notenoughtimetoreportmore broadlyonallthevirtualeconomiesinexistence.Ihavehadexperienceinthefourmajor economies,however,andIbelievethatmyimpressionsofNorratharetypicalofthemall.

Thefollowingsectionsreportdataofthree kinds.First,asapersonwhohas participateddirectlyinNorrath'smarkets,Iwillreportmyownobservations.Second,I willmakeuseofpublicly -availablewebsites.Theseconsistprimarilyofofficialsupport sitesandvariousfansites.Last,Iwillu seinformationfromasurveyofNorrathiansthatI conductedviatheinternet.

Ipostedthe "NorrathEconomicSurvey" (NES) on mywebsite on August 17, 2001, and sentamessage to two popularEver quest bullet in boards announcing the survey's existence and asking for respondents. The survey was open for about 48 hours and yielded 3, 619 responses. Since it is not random, this cannot be a representative survey of Norrath's population. However, the direction of biasis fairly easy to identify. The respondents a rethose who take the time to read fansited is cussion boards, and therefore they are more serious Ever quest users. ²⁰ It seems likely that the more serious user has been involved with the game for alonger time; therefore, her avatars should be at a higher level. It follows that the survey will be biased infavor of the experiences of high-level avatars. To correct this bias, I conducted population counts on Ever quest

serversatvarioustimesinordertomeasurethetruedistributionofavatars.Ithen developedweightsforthesurveydatasothatthedistributionofavatarsinthesurvey accuratelyreflectedthedistributionofavatarsinNorrath.Asexpected,theweightfor low-levelavatarsismuchhigherthanforhigh -levelavatars.Thereisagoodreason to believe,however,thattheweighteddataactuallyunderrepresentthehigh -levelavatars (seeAppendixB).Asitturnsout,theweightingseemstomakelittledifferenceinthe results.SeeAppendixBforanextendeddiscussionofweighting. ²¹

Withoutabroadsurveyofparticipants,itisimpossibletoestimatethegross volumeofthistrade.However,recordsatonewebsiteshowthatonanordinaryweek day (Thursday,September6,2001),thetotalvolumeofsuccessfullycompletedauctions(N= 112)wasabout\$9,200. ³²Afurther\$3,700incurrencytransactions(N=32)were conducted.Atanannualpace,thesefiguresputthegrossexportsofgoodsandcurre ncy atmorethan\$5million,about3.5percentofgrossannualoutput(seebelow).This underestimatesthevolumeoftrade,ofcourse,becausetherearemanymoreavenuesof exchangethanjustthisonewebsite.Some45percentofNESrespondentsindicated that theyknewsomeonewhohadpurchasedNorrathianitemsforUSdollars.

The currency market gives direct information about exchange rates. I collected data on 616 auctions, a trandom, from various sites, over the period from Mayto

September2001.This samplerepresents a small fraction of the universe of ongoing currency auctions. It reated an auction as availed observation only if it had been completed and there was an obvious winning bid. Across these auctions, the average price of a platinum piece iterms of US dollars was 0.01072, or a little more than a penny. The dollar exchangerates of various currencies are listed in Table 4. Most Norrathians would fix the exchangerate at about 0.0125. The rate was, in fact, 0.0133 in Maybuth adslipped to 0. 0098 by September, a decline of over 25 percentina quarter.

GNP percapita. The market for avatars can be used to develop an estimate of Norrath'sGNPpercapita.Fromthismarket,Iobtaineddataon651avatarauctions,using thesameselectionrulesandsitesasforthecurrencyauctions. Mostaccountsare auctioned as if they were sales of the main avatar on the account, that being the avatar with the highest level. However, the billing and loginstructure of Everquest means that a personcannotsell anavatarbyitself;togivecontrolofoneavatartoanotherperson,you mustgivethemaccesstoyourentireaccount, including all of the other avatars. Nonetheless, the contents of auctions are usually a few basic descriptors about the main avatar, suc hasherlevelandtype(warrior, wizard, etc.). Mostaccountssellforbetween \$500and\$1,000.Sincetheexchangeratesindicatethattypicalavatarshavemorethan \$1,000inNorrathianwealth, the avatars on the auction market are apparently being sold atadiscount.Thesourceofthereducedvalueisfairlyapparenthowever:oneofthemost attractivefeaturesoflifeNorrathisthepowertochooseyouravatar'sappearance, abilities, and even name. When your purchase aready -madeavatar,thatfreedomi slost. Moreover, the auctioned avataral ready has a well -developedsocialroleonitsserver, and

itisnotapparentwhetherthatisagoodroleornot.Forthesereasons,wecantakethe auctionmarketvalueasanunderestimateofthetruedollarvalueo fanavatar.

Mystrategyistousetheavatarauctionmarkettodeveloptheshadowpriceofan avatar'slevel,thenusetheNESdatatodeterminehowmanylevelsNorrathianscreatein ahourofgametime;thisyieldsameasureofgrossvaluecreationperh ourintermsof dollars.Theideaisthattheavatar'slevelgenerallydeterminesitsamountofequipment andplatinumpiecesaswell,sothatauserwhoaddsaleveltoanavatarincreases Norrath'sstockofavatarcapital,equipment,andplatinumpieces. Whensomeonebuysan avatarontheauctionmarket,theybuytheavatarwiththesebellsandwhistles.This meansthatthetotalvalueoftheaddedlevel,includingallthreesourcesofvalue,is pricedbytheauctionmarket.

Thereareanumberofwaysofdevelopingtheshadowprices.Idescribethree methodsinAppendixC.Usingthemostdirectmethod,theauctionmarketputsthe shadowpriceofanavatarlevelatabout\$13perlevel,anddatafromtheNESshowthat Norrath'savatarscreateabout\$15,000 inavatarcapitalinanhour.Thismakesthegross nationalproductofNorrathabout\$135million.Percapita,itcomesto\$2,266.Table5 showsthegrossnationalproductpercapitaof171countries,asmeasuredbytheWorld Bank.Norrathisthe77 thric hestcountryintheworld,roughlyequaltoRussia.Thetable alsoshowstheresultoftwoothermethodsgivealowerGNPpercapita,thelowest makingNorrathequivalenttoBulgaria.Byallmeasures,Norrathisricherthanmany importantcountries,includ ingChinaandIndia.

Inflation. Atruepriceindexwouldrequireabroad -basedsurveyofavatarsto determinewhatitemstheyhadrecentlypurchased, and atwhatprices. Given that there

aretensofthousandsofitems, the survey would have to be quite ext ensivetogeneratea reasonablylargeamountofdataaboutalltheitemsinthemarketbasketoftypical avatars.Inlieuofundertakingsuchanenterprise,insteadImadeinformalnotesofthe kindsofitemsthatseemedoftentradedinthemainmarkets.T herearealsoanumberof websitesthatpublishplatinumpiecepricesofvariousgoods.Usingthesedata,I developedapriceindexbasedonaselectionof29differentgoods. The goods were chosentoberepresentativeofthedifferentkindsofitems(che starmor, boots, helmets, weapons, etc.). Also, Ipurposely tried to avoid very high -enditemsandverylow -end items.Finally,unlikerealworldpriceindices,Icouldnotweighttheitems'pricesby theircontributiontothe'marketbasket,'sinceIcoul dnotdeterminewhatthestandard bundleofitemsreally is. Therefore, each item is given equal weight. I also record whetheranitemislooted from biots or crafted by avatars, as well as whether the itemis partoftheoriginalEverquestgameoroneof thelaterexpansionsofthegame("The RuinsofKunark"wasreleasedinApril2000,"TheScarsofVelious"inDecember2000.)

Havingselectedtheitems,Itookpricedatafromonesite,Allakhazam'sMagical Realm(everquest.allakhazam.com).Thissiteison eofthemorepopularfansitesand, importantly,thepricedataareenteredbyusersandthenleftuntouched. ³³Pricesare availablebeginninginDecember2000.

Table6reportstheseindices.Theoverallpriceindexfellfrom100inQ42000to 71inQ32001,a29percentdeflationinoneyear.Theindividualitemindicesindicate thatmuchofthisdisinflationwascausedbyapricecollapseinitemsfromthe expansions,whichlost59percentoftheirvalue.However,eventheoldworlditems experienceda substantialdeflation,withtheirvaluefallingby17percent.Notethatif

nominalwages(i.e.lootfrombiotsperhourofhunting)remainedconstantinthisperiod, thedeflationrepresentsarapidriseintherealwage.ThisisagoodthingonEarth,bu hasledtosomedissatisfactionNorrathasthechallengeleveloftheworld,andhenceits entertainmentvalue,hasfallen.

Nominalwages .HourlywagesinNorratharesubstantiallybelowwagesonEarth. Wecanderiveanestimateofthewageinplatinump iecesbyregressingthetotalvalueof anavatar's equipmentand cash by the number of hourst hat avatar has been active. The 3,619NESrespondentsgavevalidinformationon7,397oftheiravatars.Regressingthe PPvalueoftheirholdingsonhoursoftime inputyieldsacoefficientof319, meaning that theaverageavatarmakes319PPperhour.Atthemarketexchangerateof0.01072PP perdollar, this amounts to about \$3.42 and our. The average Earthwage for those who workintheNESis\$20.74,andamong theself -identifiedresidentsofNorrathitis \$17.57.If we treat the conditions of life in Norrathas a compensating differential, this suggeststhatfortheaverageNorrathresident,anhourinNorrathproducesutilityworth \$14.15.Thisfigureismore thanthefeeof\$10per *mont***t**hatuserspaytoaccess Norrath.Norrathiansgainasubstantialconsumersurplusfromtheworld'sexistence.

Awageof\$3.42anhourissufficienttosustainEarthexistenceformanypeople. Manyusersspendupwardsof80ho ursperweekinNorrath,hoursoftimeinputthatare notunheardofinEarthprofessions.In80hours,attheaveragewage,thetypicaluser generatesNorrathiancashandgoodsworth\$273.60.Inamonth,thatwouldbeover \$1,000,inayearover\$12,000. ThepovertylineforasinglepersonintheUnitedStates is\$8,794.Economicallyspeaking,thereislittlereasontoquestion,onfeasibilitygrounds t

atleast,thatthosewhoclaimtobelivingandworkinginNorrath,andnotEarth,may actuallybedoing justthat.

Povertyandinequality. Inequalityissignificant.Certainly,higherlevelavatars havevastlymorewealththanlower -levelavatars,butthisisintendedaspartofthe structureoftheworld.Itismorestrikingthatsignificantinequalityexistswithinlevels,a factthatseemstotroublemanyNorrathians.Usingavatarwealthholdings,wecan calculatetwostatisticsofinterest.First,definethepovertyrateasthepercentageof avatarswhosewealthfallsbelow50percentofthemedianwealt hintheirlevel.Bythis measure,about33percentoftheavatarsarepoor.Ifinsteadwesetthepovertyline accordingtothemeanwealth,notthemedian,thepovertyrateis68percent.Evidently thedistributionisextremelylongintheuppertail.In anycase,thedistributionofwealth inNorrathisapparentlysignificantlylessequalthanitsdistributioninpost -industrial societiesonEarth.

IV.Norrath:Itsfutureandmeaning

journalentry,20june.istartedaloner,anasocialavataronadea dlyserver whereallavatarshunt,kill,andlootoneanother.anyonestudyinghobbesshouldcome hereandhavealookatthestateofnature.

Whyshouldeconomists and others ocials cientists have an interesting laces like Norrath? One reasonist hatt hese places provide a fascinating and unique laboratory for research on human society; Appendix Alists a number of research projects that seem to be uniquely feasible in Norrath. The second and more significant is that VWs may soon be come one of the most important for ums for human interaction, on a level with telephones.Moreover,inthatrole,theymayinducewidespreadchangesinthe organizationofEarthsociety.

VirtualWorldsareflourishingandtheirgrowthseemslikelytocontinue.They alreadyrepr esentanareaofinternetcommercethatisboomingwhenothersectorsare havingdifficultysurviving.TheattractionoftheVWliesinitsabilitytoreplicatethe physicalandeconomicworldofEarth,withslightbutsignificantchangesintherules. Thesechanges –suchasgrantingpeoplethefreedomtohavewhateverappearanceand skillstheywish –aresufficienttogenerateasocietyandaflavourofdailylifethatisso attractivethatmanythousandsofpeopleapparentlyconsiderthemselvespermanen residents.TensofthousandsofadultsnowdevotemoretimetoVWsthantopaid employment.SimilarnumbersusetheirEarthmoneytobuythingsinVWs.Almostone millionseemwillingtopayamonthlyfeetoatleastseewhatVWsareallabout.And thesenumbersaregrowing.

Whatdoesthefuturelooklike?TheNextBigThingappearstobeProject Entropia,expectedtobelaunchedsometimeinearly2002.WhereNorrathconsidersthe infusionofEarthdollarsandEarthmarketsaproblem,ProjectEntropiaem bracesthem. Thegame(whichisapparentlynotreallyagameatall,accordingtoitsowners)isbeing developedbyaprivateSwedishcompany,Mindark.Accordingtomaterialsonthe companywebsite(www.mindark.com),theultimategoaloftheprojectisaw orldwide networkmonopolyinvirtualreality3Dcommerce,replacingallexistinginternet browsersandwebinterfaceswithasinglevirtualworldofmillionsofusers.The"game" willbedistributedforfree,andaccesswillbefree;itisassumedthatas eedlingVW marketandsociety,alongthelinesofNorrath,willrapidlyemerge.UnlikeNorrath,

32

t

however,usersinProjectEntropiawillbeabletobuythingsfortheiravatarsusingreal currencyandcreditcards,andtheywillgetrealcashfromtheVWby sellingloot.

Thecompanyhopesthatsuccessinthegamingworldwillbeabeachheadto broadercommercial success. Freesoftware and free access to the VW will encourage moreandmorepeopletocometoProjectEntropiatosocializewithoneanother, and then toshopwiththeiravatarswhiletheysocialize.Networkeffectswillkickin;ifyouand yourfriendsspend800hoursdevelopingavatarsinProjectEntropia,nosinglepersonin yourgroupwillwanttoincurafriendless800 -hourstart -upcosttosw itchtoacompeting world.AtsomepointtheProjectwillencouragebrick -and-mortarcompaniestoestablish virtual3Dstoresintheworld, whereaperson could go to buy a hatforthe avatar, and thenahatforthemselves.Mindarkenvisionstheemergence ofvirtualjobs.Forexample, Walmartmightpayauser(inwhichcurrency?doesitmatter?)touseheravatartosell avatarclothesinthevirtualWalmart.Bytheeconomicsofnetworkmonopolies,the ProjectEntropiaVWmaybecome"theinternet"formost people:youturnonyour computer, wakeupyour avatarin Project Entropia, and teleporther to some spotwhere youmeetyouroldcollegefriend'savatar, chatforawhile, then goshopping.

MucharguesfortheviabilityofMindark'sstrategy,andthecompa nywill probablynotbealoneinthisnicheforlong.Indeed,thereisalreadyevidenceinexisting VWsthattheinclusionofEarth -stylemarketsandmarketingwouldbeprofitable. Microsoft'svirtualworldof"Dereth"hasmarketsthatareclumsierthanNo rrath's,and Dereth'spopulationissmallerandnotaswealthy.Thatisexactlywhatdevelopment economistswouldpredict.Transactionscostsslowdowneconomicgrowth.Itfollows thatmodernizedmarketswouldallowanewVWtorapidlyeclipseNorrathinp opulation

andwealth, brushing as ideits quaint baza are conomylike the anachronismit was designed to be. The future of avatars paces, and perhaps internet commerce and the internet itself, may belong to highly commercialized VWs.

TheimpactonEarthsoci etyishardtooverestimate.Withthedevelopmentof voicetechnology,communicationinVWswillmovefromcumbersomechatto telephone-likeconversation, thus greatly enhancing the VW as a place of social interaction. Alreadyone can conduct chat -baseda2 ameetingsandclassesinplaceslike Norrath, and soon such meetings will not seem much different from actual face -to-face meetings. Telecommuting, which now involves working on the home computer and emailingreportstotheboss, will eventually become "g oingtowork"inavirtualoffice andholdingfacetofacemeetingswiththeavatarsofcoworkers.Familiesliving thousands of miles a part will meet every day for a few hours in the evening, gatheringtheiravatarsaroundthevirtualkitchentableandcat chingup.Andthedayofdrivingto thestoremaywellbeover.Earthroadswillbeemptybecause, instead of using them, everyonewillbesailingacrosstheazureheavensontheirflyingpurplehorses, to shimmeringvirtualWalmartsinthesky.

journalentry,28May.istartedanewavatar,justsoicouldlookatadifferent continent.thisguyisadwarf.dwarveshatewater,nowiknowwhy.itookaboatacross anocean.atanislandstop,someidiotfellow -travelerprovokedalocalbiotpirate,who cameontotheshipandstartedattackingme.neardeath,itookmyonlyreco urseand jumpedofftheboat.toobadithadlongsinceleftthedock.iwatcheditsailoffintothe mist,leavingmedesperatelypaddlingabout,faratsea,averylonelydwarfindeed.

Inthecourse of preparing this report, I was struck by the number of research projects that would be uniquely feasible in Norrath. Here I will list a few.

Utopia.Whatistheidealsociety?Philosophersandtheologiansdebateitinthe abstract, while politicians, journalists, and social scientists attempt to remold Ea rth societiesinwhattheypresumearegooddirections.Butwhenbusinesspeopleactually designfee -basedsocieties, we discover in the most popular ones the kind of world that ordinarypeoplewantthemost.Ifordinarypeopleactuallywantedaworldofe quality, peace, relaxation, freedom from want, then Norrathwould be an equal, peaceful, relaxing,freeworld.ButtheNorraththatmakesmoneyisnotacyberpolynesiaatall.Itis aworldofgrotesqueinequality, of incessant warfare and struggling, awo rldwithbitter wantsandunmetneeds, where rising real wages make people *complain*.Itismuchlike Earth, except for two elements that are quite utopian and have been impossible to implementhere:freedomtostartover.andequalityofopportunity.Itwo uldseemthat UtopiaisjustEarthwithanescapeclauseandalevelplayingfield.

Socialnormstudies .IntheNES,7.7percentoftherespondentsarefemale,but 18.7percentofthemainavatarsarefemale.Itturnsoutthat12.6percentofmalesare playingfemalesastheirmainavatar,while11.2percentoffemalesareplayingmale avatars.Thatsomepeopleswitchgenderisawell -knownfactinNorrath,anditisalso

well-knownthatsexdoesnothaveanyimpactontheavatar'sskillsandabilities. Nonetheless, it appears that male and female avatars are treated differently. (See two essays one conomics and gender in Norrath by Mindy Basi (PhD, Library and Information Sciences, at www.angelfire.com/journal/kwill/).

Onecouldconductendlessstudieso ntheimpactofvariousfeaturesoftheavatars ontheavatar'soutcomesandsocialstanding.Asaresearchmethod,onecouldhavestudy participantsdovariousspecificthingswiththeavatarandthenrecordtheavatar'ssuccess ataccomplishingvarioust asks.SincesocialactivityinvolvesrepeatingN -player prisoner'sdilemmaswithafluidpopulation,itisanidealenvironmentforstudying cooperation.Itwouldberelativelyeasytoholdexperimentsandprovidemeaningful payoffs,sincePP --whichhave agreatdealofvalueinNorrath --canbepurchasedfor onlyaboutapennyapiece.

Marketstudies. Theworldhasflourishingcentralmarketsingoods.Itwouldbea simplemattertoconductauctionsinanumberofwaysandrecordtheiroutcomes.Again, theitemsforsalearereallyquitevaluabletothepeoplethere;thereisahighlikelihood thattheauctionorexperimentwouldbetakenseriously.

Social conventions . There are many conventions in Norrath, and variation in them can be directly observed be cause of the way that the world exists on 40 different servers. This variation can be exploited to allow comparatives tudies of the emergence of conventions and focal points. For example, there is one main market place on each of the 40 servers, and on most, but not all, servers it is located in the East Commons Tunnel. Now its ohappens that some times Verant will create an ewserver as a "split" from an old one; the newserver is launched and the nany avatars on certain old servers may transfer

tothenewserver.Abriefexaminationoftheserver -splitpatternsrevealsthatanew serverisfarmorelikelytohaveitsmarketsomewhere *besides*theECtunnelif,andonly if,atleastoneofitsmotherservershaditsmarketsomewhereelse.Inotherwords, there isstrongevidenceofpathdependenceinthegeographicallocationofthemainmarket.

Lawandeconomics .Manyoftheservershavedifferentrulesaboutwhocankill whomandhowmuchlootanavatarcantake.ThemostHobbesianserver,RallosZek, doesnotyethaveasovereign.Italsohasweakandsplinteredmarketsandalow population.Otherserversdividetheavatarsintowarringracesorcontinents.Onecould learnmuchbytracingthestatusofmarketstolegalconditions.

Poverty.Norrathism arkedbyanextremelyunequaldistributionofwealth.Thus, ifthequestionis"Ifwecouldconstructanyworldwewished,inordertomakeourselves happy,wouldwechooseonewithequality?"theanswerfromNorrathseemstobeaclear NO.Mostpeoplein Norrathseemtobelievethattheworldanditsrewardsystemare basicallyjust.Rather,thereissomeconcernaboutthepracticeoftwinking,bywhichthe wealthofapowerfulavatarisusedtogiveanewavatarextraordinaryequipment.This revealsthat theoneethicalnormthatdominatessocialpoliticsinNorrathisnotequality ofoutcomesbutequalityofopportunity.

Spontaneousorderandendogenousgovernment .Mostservershaveanelaborate politicalorderbasedonguildsofavatars.Theguildsyst emregulatesaccesstocertain scarceitemsandimposespunishmentsonasocialbehavior.Guildscanwarwithone another.Anexplorationofguildbehaviorcouldproduceusefulinsightsaboutthe emergenceofgoverningstructures.

Urbanlocation .Whyisth emainmarketintheECtunnelinmostcases?That particularspotissomewhatinthecenterofNorrath,butithasonlyonebiotmerchant,no conveniences(ovens,forges,etc.),noprotectingbiotguards,andnobank.Thenearby cityofFreeporthasmany vendors,abank,allthemajorconveniences,anditisawalled cityprotectedbyguards.WhynotFreeportinstead?Themainreasonwouldappeartobe thatapercentageoftheavatarsinNorrathhaveafactionidentity('evil')thatprevents themfromente ringFreeport.Theycan,however,cutaroundthecitybyusingthetunnel. Anditwouldseemthatthisistheonlyreasonthetunnelispreferredtothecity:ithasa slightlygreateramountofthroughtraffic.Ofcourseitwouldtakeageographertogive moresolidanswer.Still,thedistributionofNorrath'spopulationinspace,andthe endogenousemergenceofurbanareasthatwerenotdesignedtobeurban,canprovide usefulresearchmaterialsforthoseinterestedintheeconomicsoflocation.

These areonlyafewofmanyotherprojectsthatmightlendthemselvestoan applicationinNorrath.Theprimarydifficultyfortheresearcherwouldbethecosts involvedinbecomingfamiliarwithwhatis,atfirst,averystrangeworldindeed.

а

TheNorrathEconomicSurvey(NE S)wasconductedbypostingnoticesto internetdiscussionboardsfrequentedbyEverquestplayers.Thus,thesampleisentirely self-selected.However,thereisacleardirectionofselection,inthatthosewhorespond aremorelikelytobeanavidplayer ofthegame.Thus,theNESsamplecontainsavatars whoselevelswillbehigherthanthelevelsofavatarsinthegame'spopulation.Whilein game,onecannotobserveanythingaboutanavatar'susers,socorrectingforthebiason thebasisofuserinformat ionisnotpossible.However,itwaspossible(untilAugust31, 2001)toobservethedistributionofavatarsbylevelonagivenserver.

IusedactualdistributionsofavatarlevelsonEverquestserverstoassignweights toNESrespondents.Theweightsen surethatthedistributionofavatarlevelsintheNES correspondstothedistributionoflevelsinthegame.Itseemslikelythattheweights reduce(althoughtheymaynoteliminate)thecorrespondingbiasintheNEStowards moreavidplayers.

Mymethod forweightingwasasfollows.Iobservedavatarsbydistributionon twoservers, TarewMarrandTholuxePaells, overa72 -hourtimeperiod.Thefirstisone oftheoldestserversinthegame, these condisone of the newest.Since newer servers are likely to have less advanced avatars, the twoservers putbounds on the likely range of level distributions.Asitturned out, the distributions we resurprisingly similar.Ibroke the distributions down intogroups of five levels, so that in the end I had 12 numbrs indicating the percentage of Norrath's avatar population having levels from 1 to 5,6 to 10,11 to 15, and soon.Call these percentages p1, p2, p3, etc. In the NES sample, the corresponding percentages by level can be labeled q1, q2, q3, and soon. If the NES sample size is N1 and the Norrath population is N2, the weight applied to a level 1 avatar

intheNESwas(N2/N1)*(p1/q1).Thus,theweightedpercentageoflevel1to5avatarsin theNESwouldbecomep1.

ImadetheseweightcalculationsforTarew MarrandTholuxePaellsseparately andthenaveragedthemtoderiveasingleweight.

Ithenused these avatarweights to derive a personweight for the NES respondents. Each respondent had been asked to indicate what percentage of time he played each of his avatars. I used these percantages to make a weight ed average of the weights one ach of his avatars. Thus, a person who uses a level 1 avatar frequently and a level 30 avatar less frequently would receive a higher weight. This is because Ever quest population has more level 1 avatars than the NES sample.

TableA1belowliststheavatarweightsbylevel.ThetablereflectsthatN1,the samplesizeoftheNESis3,619andN2,thepopulationofNorrathroundtheclock,is 60,381.ThusN2/N1=16.68,andthe weightsaredistributedaroundthisfigure. Interestingly,thebiggestdeviationoftheNESfromNorrathisnotatthetopbutatthe bottom.Low -levelavatarsarequiteunder -represented,buthigh -levelavatarsarenot heavilyover -represented.Instead,i tisthemid -levelavatarswhomostlyselected themselvesintotheNES.Perhapsthisreflectsthepossibilitythathighest -levelavatars knowthegamesowellthattheynolongerspendtimeat'spoiler'websites.

Level	Weight

TableA1.AvatarWeightsfortheNESsamp le

AppendixC.MethodsofcalculatingGDPpercapita.

journal entry, september 24. iinvestigatean other server – ithappenst obethe onewhere is started myfirst avatar, alaniel. ihavent been backs ince. soil oad him into the world. arriving, is miletomyself -- heiss till hiding behind the lean -to atfree port westgate.

The first method is simplest. A regression of price on level in the auction market

yieldsthefollowingequation:

Price= -319.625+13.297*Level

Thisimplies that the shadow price of a level is about \$13.30.

TheNESasksrespondentshowmuc htimetheyhavedevotedtoeachavatar.A

regressionofhoursoftimeforthehighest -levelavatar(whichisalwaystheavatarthatis

thesubjectoftheauctionmarket)ontheavatar'slevelyieldsthisequation:

Hours= -568.129+51.440*Level

Thisimpl iesthatittakesabout51.4hourstoaddaleveltoanavataronaverage.The

60,381 users present in Norrathina given hour are therefore adding about

(60381/51.440) = 1,173.81 levels to their avatars in that hour. Each level being valued on

themarket at \$13.297, we have a gross creation of value that a mounts to (1,173.81)*(13.297)= \$15,608.15 per hour. Now because the 60,381 average user population is an average over all times of day and all days of the week, it reflects an avatar-building work forcet hat is present round the clock, all year long. The average, in otherwords, indicates that there are typically 60,381 people actively building avatar capital at any time of day ornight, weekends, holidays, whenever. This goes on all day long, 365 days and ear. There are now eekends or vacations in Norrath; 60,381 represents not full -time equivalents but "all -time equivalents." This means that the annual creation of value for this economy is found by taking the hourly creation of value and multiplying by the number of hours in a year, which is 8,766. This makes the gross national product of Norrath equal to about (8766)*(15608.15)=\$136.821 million. Dividing by the population of 60,381, we estimate the annual GNP per capita as \$2,266.

Thisisthemoststraig htforwardapproachbutnotperhapsthemostplausible.An examinationofscatterplotsoftheavatarauctiondata(seeFigureA1)suggeststhatthe simpleapproachisbiasedinsomesignificantways.Mostly,itdoesnottakeintoaccount thatthereisalmos tnomarketforavatarsbelowlevel20.Second,itignoresthefactthat levelsabove50aregivenamuchhigherpricebytheauctionmarket.Third,itignores thatfactthataddinglevelsbecomesmuchharderafterlevel50,somethingthatis apparenttoa nyoneactiveinNorrathforanylengthoftime.

Tocorrectfortheseaspects,firstofall,Iwillassumethatavatar -buildingbelow 20addsnothingtotheGNP.

Second, thescatter plots suggest that between level 20 and level 50, the dollar value of an av at arrises moderately, and after level 50 it rises more rapidly. A linear

splineregressionofpricesonlevelsrevealsthatthepriceofanavatarrisesbyabout \$5.33perlevelbetweenlevels20and50,andbyabout\$37.37perlevelabovelevel50.I willusethesefiguresastheshadowpricesofaddingaleveltoavatarsatthe correspondinglevels.

Asforthecreationoflevels, what is needed is some measure of how longittakes toaddaleveltoanavatar. This inturn requires a regression of the hou rsdevotedtoan avatarontheleveltheavatarhasattained. The NES asks respondent directly how many totalhourstheyhavespentonagivenavatar, butitisnotclearhowaccuratesuch responses would be. A typical avatarism or ethan one year old -ho wmanycould accuratelyestimatehowmanyhourstheyspentonagivenactivityoverthepastyear?On theotherhand, there is reason to be lieve that these responses might be extremely accurate.ForplayersofEverquest, it is actually possible to observe exactlyhowmany hoursanavatarhasbeenactive, simply by typing a command. But we cannot know how manyNESrespondentsdidthisbeforeenteringtheirresponses.(Somewereactually confusedaboutwhetherthequestionwantedearthhoursorNorrathhours, whichare muchshorter.Formanypeople,Earth'spositionassolelocusofRealityisreallyquite unstable.)Soperhapsthefiguresareinaccurate.

Inanticipationofsuchaccuracyproblems, the NES also asks respondents what percent of their total time they devote to each of their avatars, as well as the month that the avatar was born. Its eems fairly likely that both of these responses are more accurate than the grosshours estimate. The NES then asks respondent show many hours they spendin Norrathin atypical week. The total hours per avatar can be measured as total

hours=(monthsavatarhasbeenalive)*(4weekspermonth)*(XhoursinNorrathper week)*(percentoftimeonthisavatar).

Itturnsoutthatthedirectestimateofhoursperavataraverag e798hoursinthe NESsample,whiletheindirectmethodaverages1,443hoursperavatar.

Iestimatedtwosplineregressionsofhoursonlevels,estimatingthenumberof hoursnecessarytoaddalevelbetweenlevels20and50andabovelevel50,withthes e twomeasuresoftimeinput.Forthedirectmethod,theregressionindicatedaninputof21 hoursperlevelbetween20and50,and152perlevelabove50.Fortheindirectmethod, theinputswere31hoursperlevelbetween20and50,and183hoursperlev elabove level50.

Of the 60,000 avatars present in Norrathatany one time, 27,600 are between 20 and 50, and the remaining 22,200 are above 50. Recall that these figure have been weighted to reflect the fact that the NES over - represents high - level avatar s, and that the weighting method probably makes than under - represented. These figures indicate that, in a given hour, the middle group is responsible for 27,600 hours of avatar level creation, and the high ergroup is responsible for 22,200 hours of avatar level creation.

Usingthedirecttimefigures,themiddlegroupproducesanaggregateof 27,600/21=1,314levelsperhour,valuedat\$5.33each.Thehighergroupproduces 22,200/152=146levelsperhour,valuedat\$37.37each.Thuseachhour,Norrathians generate1314*5.33+146*37.37=\$12,460worthofavatarcapital.Inthecourseofa year,thisis\$109millioninnewavatarvalue,about\$1,820peruser.Thiswouldmake Norraththe84 thrichestcountryintheworld,equivalenttoTunisia.Seetable5. Usingtheindirecttimefigures,themiddlegroupproducesanaggregateof 27,600/31=890levelsperhour.Thehighergroupproduces22,200/183=121levelsper hour.Usingtheshadowpricesoflevels,aggregatehourlyproductionisvaluedat \$9,265.47.A nnually,thiscomesto\$81million,or\$1,350percapita.Thatwouldmake Norraththe97 thrichestcountryintheworld -Bulgaria.

Notethatallofthesefiguresarebasedontheavatarauctionmarket,whichis basedonavatarswhosefeaturesarealread yfixed.Theyarelikelytobesoldatadiscount relativetoavatarswhosefeaturescouldbefreelychosen.

Labormarket. ThelabormarketinNorrathisessentiallythehuntersmarket.It determinestheamountofhunting/farmingthatgoeson,aswellasthecompensationfor anhour'shunting.Wewilltake therelevantquantityinthismarketas"Hoursofhunting levelXMOBsbyallavatars,duringthecurrentmonth."Therelevantprice,orwage,will

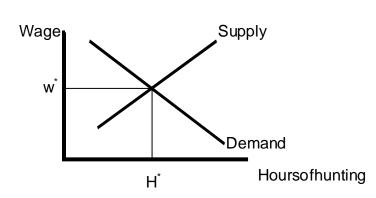

be"PlatinumpiecesearnedperhourofhuntinglevelXMOBs,duringthecurrent month."

Lookingatsupply first, avatars differint he cost of under taking hunting activity at a given level. The higher the return to hunting, the more hunting hours avatars will under take. Therefore the supply of hunting hours rises with the wage.

Thedemandsideofthemarketi ndicateshowmuchcompensationisavailablefor avatarsastheyworkmore.Standardeconomictheorysaysthatanincreaseinthetotal numberofhoursofhuntingwilla)increasethetotalamountofloot,butb)willdecrease themarginallootfromanaddi tionalhour.AsmoreandmoreavatarshuntMOBsofa givenlevel, they create congestion and crowding, and this less enst heamount of loot that canbegained by hunting for an extra hour. Let H be the total hours of hunting labor for MOBsofagivenlevel. If TP is the total product of hunting labor (the total loot perhour ofallavatarscombined), and MP is the marginal product of hunting labor (the extraloot foranextrahourofhunting), production theory says that TPrises as Hrises, but MP eventuallyfallsasHrises.Nowtherelevantdecisionforeveryavatar,indeciding whetherornottohuntanextrahour, is to compare heropport unity cost of hunting for that extra hour to the compensation she would get. That compensation comes from selling the extralootshewouldgettothemerchantbiots, who, we assume, payprice R B;thereal value of those platinum pieces also depends on their purchasing power, which is a function of the overall price level. If the overall price level in Norrathis P, the v alueofan extrahour'shuntingisgivenbythefunction

D=(R B/P)*(MP)

Thiscompensationisessentiallythedemandcurveinthelabormarket, and its lopes downward. The market is depicted in Figure S -1.

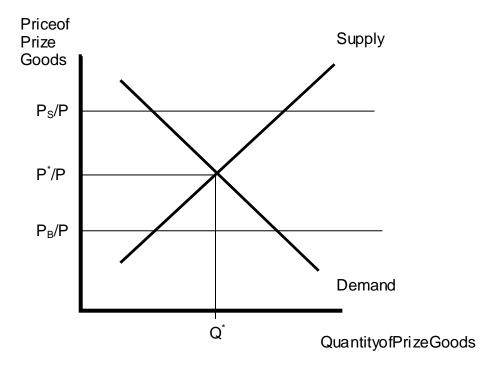

S -1.LaborMarket

Inthismarket,t heequilibriumhoursofhuntingisgivenbyH *.Theequilibrium compensationisw *,whichisequalto(R $_B/P$)*(MPatH *).Fortherestoftheanalysiswe willholdthesupplycurveasfixed.Thedemandcurvecanshift,however.Forexample, ifmerchantbiot spaymoreforthelootprovidedbytheseMOBs,thenR $_B$ rises,meaning thatdemandshiftstotheright.Bothhuntingandwagesincrease.If,however,all merchantbiotspaymoreforallgoods,thenthegeneralpricelevelPrises,anddemand shiftstothe left.Bothhuntingandwagesdecrease.

Goodsmarkets. Asforgoods,itwillbeusefultoconsidertwokindsofgoods;I willcallthem'prizes'and'loot'forreasonsthatwillbecomeapparent.First,consideran amazingmagichelmetthathasjustbeendis covered.Onitsfirstday,thehelmetcountsas aprizegood:demandisheavy,andavatarswillpaymuchmorethananymerchantbiot's buyprice(callthisP _B)inordertohavethehelmet.Still,thehighertheprice,thefewer avatarswillwantthehelmet ,soitsdemandisdownwardsloping.Thesupplyofthe

helmetisdictatedbythewillingnessofavatarstohunttheMOBswhodropit.Fromthe labormarket,weknowthathuntinghoursrisewiththelevelofcompensation.Therefore, ifthepriceofagoodr ises,therewillbemorehuntingofitsMOBsandthereforea greatersupplyofthegoodinthemarket.Thereforesupplyslopesupward.Andfinally, sincethisgoodisindemandbyavatars,weknowthatthemarketequilibriumpriceis abovethepricethatm erchantbiotswillpaytobuythegood.Thatprice,intermsofreal purchasingpower,wouldbeP $_{\rm B}$ /P.Also,sinceavatarsrarelyendupbuyingprizeitems frommerchants,wecanalsoassumethatthemarketequilibriumpriceisbelowthe merchantsellprice ,P $_{\rm S}$ (whichinrealtermsisP $_{\rm S}$ /P).ThesituationisshowninS -2below.

Theprizemarketdeterminesanequilibriumprice(P */P)andquantity(Q *)ofthe good.Themarketisentirelyinthehandsofavatars.Merchantbiotsplaynorolebecause theyare offeringtobuyatapricebelowthemarketequilibrium,andofferingtosellata priceaboveit.

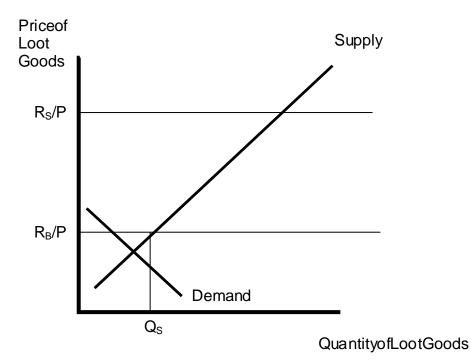

Notethatthesemarketsaredefinedwithinperiodsoftime,sothatQ^{*}isthe quantityofhelmetsboughtandsoldthismonth.InNorrath,theseitemsnever decay,and, unlesstheirownerretiresordestroysthem,theitemsneverleavetheeconomy.This meansthat,overtime,thedemandfornewhelmets --onesnewlylootedthismonth -falls.Asdemandfalls,thepriceofthehelmetsdeclines.Eventually,the priceinthe avatarmarketisclosetoorevenbelowthepricethatbiotmerchantswillpay.

 $\label{eq:action} Atthatpointtheprizeitembecomesalootitem: agood that avatars sell immediately to the nearest biotmer chantfor cash. They do this because the good has low or novalue in the avatar market and is not worth the trouble of selling there. Therefore they are willing to accept the biotmer chantprice (R B) even though it is quitelow. The lootmarket looks like Figure S -3.$

Inthelootmarket, there alpurchasing power of the merchant biot buy price R_B/P determines the quantity that avatars hunt for, loot, and sell (Q s). Generally, there is no a 2 amarket for loot.

Anyonewhohasobservedthelaunchofaserverisawarethat,foracertaintime, thereisanactive marketforpatchworkarmor.Thatmarketeventuallycollapsesas demandforthecheaparmorfalls.Eventually,patchworkitemsbecomeloot;ifoneever acquiresit,onesimplysellsittothenextmerchant.Indeed,thepermanentnatureof goodsinNorratha ssuresthateveryitemwilleventuallybecomeloot.Theonlywaythis

wouldnothappenisifa)enoughnewlow -levelavatarskeepenteringtheserversothat
 demandfornewly -looteditemsremains,orb)higher -levelavatarsregularlyretireor
 destroythei rgoods.Eitherphenomenonkeepsthedemandfornewgoodsfromsliding.
 However,recentexperienceinNorrathisthatdemandcannotbesustainedinthisfashion.

Thus, the general trend has been for goods prices to fall a sprize goods become loot. When they become loot, the goods' prices stabilize. Returning to the labormarket, we have that P Bremains constant through time while the general price level, P, constantly falls. The effect is to shift demandright ward, which results in higher hourly compensation and an increase in hunting hours. The increase in hunting has well -known side effects in Norrath: an increase incrowd ing at spawn points, an increase in kill stealing, and a tilt in the loot balance in favor of the higher -level avatars who can should er lower -level avatars away from goods pots. Also, once the merchant biot prices become *the* price of goods, the market tends to strong ly encourage farming over hunting. This is because the biot merchant prices do not put enough value on magicitems. When

Policyproblems .ThesedynamicsintheNorratheconomyar etakenas troublesomebymany.Therearethreebasicproblems:

First,Norrathmustbeentertaining.Tobeentertaining,itmustbechallenging.To bechallenging,valuableitemsmustbehardtoget.Ageneraldeclineinprizeitemprices makesiteasier togetvaluableitems.Ultimately,itwatersdowntheNorrathexperience.

Second,Norrathmustbefair,inthesensethatavatarswhomakesimilarefforts andtakesimilarrisksatsimilarlevelsshouldgetsimilarrewards.Ageneraldeclinein prizeitem pricesmeansthatlater -arrivingcohortsofavatarsgethigherrewardsfortheir effortsthanearly -arrivingavatars.

Third,Norrathmustprovideavatarswithinterestingactivitiesandgivethemthe properincentivestoundertakethem.Whenlootandmag icitemscanbesoldforaboutthe sameamounttobiotmerchants,themerchanteconomyissignalingtoplayersthat farmingismorelucrativethanadventuring.Theyrespondinarationalwaytothat incentiveandspendmoretimecampingeasyspawnpointsi nsteadofhuntingdown dangerousMOBs.Thisdegradesthehuntingexperienceforall.Withlowprizeitem prices,manyavatarswilldecidethat,ratherthanattackriskyanddangerousMOBsto obtainanitem,itwouldbeeasiertosimplyfarmlower -levelMOB Sandgetenoughcash togobuyit.If,conversely,prizeitemswereextremelyexpensive,huntingthedangerous MOBfortheprizewouldseemmoreattractivethanfarmingtheweakMOBformoney.

PolicydiscussionOverthelongrun, ageneraldeclineinpricescreatesproblemsfortheentertainmentvalueofNorrath.Decliningpricesmeansdecliningchallengesandashifttowardfarming, andtworecentVWs(AnarchyOnlineandWWIIOnline) havestruggledbecauseavatarshavetooquicklyrunoutofchallengingthingstodo.

Thedirectpolicyrecommendationwouldbetofindsomewaytokeepprizeitem priceshigh.Onewaywouldbetokeepdemandhigh.Ondiscussionboards,variousways ofcreating'sinks'ofitemshavebeenproposed,suchasitemdecay.Thiswo uld essentiallyforceavatarstorenewtheirstocksofprizeitemsfromtimetotime,andwould keepthedemandhigher.Butitisunlikelythatuserswillbehappywithanysystemthat makesthemlosetheirprizeitems;anyoftheproposedsystemsseemted iousorunfair. Andthesinkwouldhavetofunctiononanongoingbasisatveryhighvolumestohave anyeffect.

Otherproposalsinvolvemakingmoreitemssimplyuntradeable.Thisseemstogo againsttheauthorities'stateddesiretoencouragefunctioning andlivelyavatarmarkets.

Anotheroptionistokeepofferingexpansionsandnewitems,sothatatanytime therewillbealargenumberofprizeitemswhosepricesarestilldeterminedintheavatar markets.Thiscreatessomethingofanarmsrace,howe ver.Tobeofinteresttotheavatar market,newitemsmustbebetterthanolditems.Oldprizeitemswillcontinuallytrickle downthelevels,enhancingthepoweroflowerlevelavatarsrelativetotheMOBsthey face.Tokeepthechallengelevelequal,th oseMOBswouldhavetobeenhancedin power.Astheauthoritiesgraduallyincreasethepowerofavatars,thepowerofMOBS hastogoup.Thisprocesscancontinuewithoutend,inprinciple.Yetitrequiresagreat dealofdevelopertimetoinventandcode newitemsandnewMOBs.

Theauthoritieshaveundertakensomepoliciestoaddresssomeofthesymptoms ofthepricedecline,notablythetriviallootcode.Thispreventshigh -levelavatarsfrom lootinglow -levelMOBs;itendsfarmingbybruteforce.Itcer tainlydoesencourage avatarstotakerisksandattackMOBsattheirownlevel,andthatisagoodthing.But again,thepolicyattacksasymptom,notacause.

Thecoreproblemofpricedeclinewillprobablyhavetobeaddressedatsome point,thoughiti snotclearrightnowwhattodo.Ongoingdiscussionsaboutitmayvery wellleadtovaluablepolicyproposals.

Otherpolicyissues: Twinking . Afinal policy issueworth discussing involves "twinking,"wherebyuserswithhigh -levelavatarstransfervastwe althtolow -level characterstheyhavecreated.Thisisperceivedasunfair;itallowstherichlevel1avatar to avoid many of the struggles and difficulties of starting out that the poor one sface. Oneanswerwouldbetonotallowuserstohavemorethan onecharacteronaserver, and Verantseemstobeimplementingthatruleonallnewservers. The problem is deeperthan this, however, because twinking can also be dones imply by purchasing thousands of PP forthecharacterdirectlyfromdollarauctionmnkets.Indeed,theexistenceoftheavatar auction markets makes it possible for two level 60 avatars to be controlled by users withradically different amounts of time input to the avatar, and this is perceived as grossly unfair.Ineffect,ittransferst hecircumstances of Earthtotheworldof Norrath. This seemstobeavery important problem, since the value of Norrath as an alternative world dependstoalargeextentonitsabilitytoallowusersopportunitiestosuccedinwaysthat theydonothaveo nEarth.Norrathmustallowsomere -writingoftherulesofEarthin ordertobeviable.

Itisnotclearhowtheauthoritiesmightendthephenomenonoftwinking. They seemintentonlimitingthenumberofavatarsperserver, which is a good policy in that tit would at least eliminate twinking between one user's avatars. Yet it would not stop twinkingfromEarthmarkets.TheseverestchallengetofuturequalityoflifeinNorrath wouldthusappeartobetheprobablecontinuinginfluxofEarth -basedmarketin gand commerceintoNorrath'spleasantandfunbazaareconomy.Perhapstheonlyfeasible strategyinvolvespreventingmaterialgift -giving, sinceeveryEarth -to-Norrath transactioninvolvesatransactionthatlookslikeamaterialgiftinNorrath.Oneavat ar getssomethingfromanother, for absolutely nothing. One approach might be to simply preventsuchtrade:allexchangesmustinvolveitemsofroughlyequalvalueonboth sides.(Therulesondroppingitemswouldhavetobechangedtoo,sincethatwouldb e anotherwaytotrade.)Anotherapproachwouldbetohaveavatarsofacertainlevel strictlylimitedinwhattheycanhave;thelow -levelitem -levelavatarwhousesahigh willsoonbreakit, and the one with a great store of wealth will soon lose much o fit.In effect this imposes level -based upper limits on the wealth of avatars. A second advantage ofthispolicyisthatitwould reduce these verewithin -levelinequalitythatnow dominatesthesocialworld.

Inanycase,twinkingfromEarthisaphenome nonthatinvitesEarth -based marketsandcommerceintoNorrath,andthiscanonlydegradetheworld'sentertainment valueovertime.Again,itisnotclearwhatcanorshouldbedone,butongoing discussionsarecertainlywarranted.

²'VirtualWorld'isaterm usedbythecreatorsofthegame *UltimaOnline*, thoughtheyseemtoprefer 'persistentstateworld'instead(www.uo.com).Neitherisauniversallyacceptedterm.Perhapsthemost frequentlyusedtermis'MMORPG,'whichm eans'massivelymulti -playeron -linerole -playinggame,'apt sinceVWswerebornandhavegrownprimarilyasgameenvironments.However.virtualworldsprobably haveafuturethatextendsbeyondthisrole.Moreover,MMORPGisimpossibletopronounce.Other terms include'MMpersistentuniverse, 'with'MM'meaning'massively -multiplayer; 'also, there is Holmsten's term, persistentonlineworld." Virtual worlds' captures the essence of the seterms infewer words, with fewersyllablesandashorteracronym; byOccam'sRazor, it is the better choice. J.R.R. Tolkien, perhaps thecultural and intellectual father of these worlds, used the term'Secondary World'to describe his fantasy universe(Tolkien, 1939). What might a maze Tolkien is how completely un -secondaryhisfantasyworlds havebecome.Iwouldarguethatvirtualworldsareneitherfantasy(constructionsofthemind)norreality (impositionsofnature). The vare Artistry: mental constructs expressed by their creators in what ever media thephysicalworld allows.Atthe20 thannualArsElectronicaFestival,aGoldenNicawasgiventoTeam chmanfortheirdevelopmentofthegameBanja(Kettman, 2001). Theaward apparently horrified many puristsofelectronicarts. Yetanyonewhohaswanderedinworldslike Norrathhasexperiencedtheartof otherpeopleatanunprecedentedlydeeppsychologicalandsociallevel. Youarenotlookingatapainting. Youare init. Anditisnotapaintingatall, but an immersive scenary that induces you and thousands of otherp eopletoplaypartsinwhatbecomesanevolvingandunendingcollectivedrama.

³ Thisusageofthetermwascoinedin1985byChipMorningstar,auserofthefirstavatarenvironment (Damer,2001).AccordingtoEncarta: *Avatar*[Sanskrit]: **1. incarnation ofHindudeity:** anincarnationof aHindudeityinhumanoranimalform,especiallyoneoftheincarnationsofVishnusuchasRamaand Krishna. **2. embodimentofsomething:** somebodywhoembodies,personifies,oristhemanifestationof anideaorconcept . **3. imageofpersoninvirtualreality:** amovablethree -dimensionalimagethatcanbe usedtorepresentsomebodyincyberspace,forexample,anInternetuser.

⁴A"biot"isabiologicalbot.A"bot"isashorteningofthetermrobotandreferstocodein multi-user domainsthatperformssomefunction; abotmaybeprogrammedtosay"hello, thisistheeconomics201 chatroom"towhomeverentersthechat; inaVW, astandardbotisthedoorthatopensandcloseswhen double-clicked.Abiologicalbotisab otwiththefeaturesofabiologicallifeform: itgenerallylooksand actslikeanavatar, butitisbeing commanded not by aperson but by coded instructions. New visitors to a VW often have difficulty at first determining which being sare avatars and which ichare biots. ⁵AsaVW, how ever, Meridian 59 is not dead. Black market versions are currently maintained in Germany, South Korea, and Russia.

⁶ThereisoftenverylittlepublicinformationaboutthesubscriberbaseofthedifferentVWs.Everquest's basewaspublicinformationuntilAugust31,2001,whenVerantstoppedpublishingthedata.Theofficial reasonsforthedecisionwereopenlystrategic:whyhelpcompetitorsbyreleasingdataonthecustomer base?UOhassaidthatithas230,000usersin120 countries(Harris,2001).Everquestissaidtohaveover 400,000users.

⁷Oninternetandnetworkeconomics,seeVarianandShapiro(1998)andasymposiumonthesubjectinthe *JournalofEconomicPerspectives* (KatzandShapiro,1994;BesenandFarrell,19 94;Liebowitzand Margolis,1994).

⁸Gamesarebigbusiness.AccordingtotheGameDeveloper'sConference(www.gdconf.com/aboutus/), gameindustryrevenueshaveexceededboxofficerevenuessince1999.

⁹Holmstenhassomeclaimtoexpertise, beingthelea dprogrammerfor Project Entropia, agamethat appears to be the next generation in VWs.

¹⁰AnecdotalevidenceaboundsthattimeinVWsputssignificantstrainonlifeinEarth(see"Everquest CreatesaTrailofCyberwidows,"Salkowski,2001;"FatherGuilt yinDeathofSon,"Karp,2001).Ihave spokentoseveralpeoplewhoclaimtohaveterminatedrelationshipsbecauseoftheirpartner'sdevotionof timetoVWs.Atthesametime,therearepeoplewhogetmarriedinceremoniesinVWs.Andwhenareal person dies,sometimeshisavatarisgivenafuneral. ¹¹Giventhatpeoplearetryingtospeakbywritinginrealtime,chatspeakisinfusedwithextensive abbreviationsandthereislittlepunctuation."omwb –brt"means"Iamonmywayback,andIwillberight there."Voiceinterfacesareindevelopment.

¹²UnfortunatelytheequalityofopportunityisbeginningtoerodeasimportandexportmarketsforVW goodsandcurrencyhaveevolved.IthasbecomepossibletostartanewavataranduseUScurrencyto instantlyendowitwithvastvirtualrichesandexpensiveequipment.

¹³ Thefirstvirtualrealityavatarenvironmentshadapparentlybeendesignedasearlyas1985(Damer, 2001).InSpring1995,WorldsChatbecamethefirstinternet -basedavatarenvironment.

¹⁴V Wsareworldsthatare *designed*tobeappealing. Theirfeaturestellusmuchaboutwhattheideal societyreallylookslike, inthemindsofordinarypeople. It is evident that the ideal society toordinary people is very different from the ideal society a sdescribed by Great Thinkers. More on this in Appendix A. ¹⁵According to the 11 thU.S. Circuit Courtin Atlanta, virtual places are geographically distinct from Earth places. In the "Voyeur Dorm" case, the court ruled that zoning laws of the city of Tampa donot apply to activities taking place in a Tampahome but broad cast on the internet. The internet activity is not considered part of the public space of Tampa; it occurs in its own "virtual space" (Kaplan, 2001). ¹⁶Norrathhas another feature that is common inhealthy Earthe conomies: getric hquick schemes. At some sites, there are auction surging yout opay \$200 toob tain material sthat will supposed by teachyou how to state the state of the state. The state of the state

make\$100,000ayearbygleaningandsellingNorrathitems.Andthenthere's"Khalid orr'sGuidetoUber Platinum,"foronly\$12,deliveringfivewaystomakeover1,000platinumpiecesperhour.

¹⁷Amongitsfans:CurtSchilling,baseballplayer;JacquesVilleneuve,racecardriver;andEdward Castronova,obscureeconomist.

¹⁸Myimpressio nisthatthebanhashadlittleimpactontrading.Sony,effectivelythegovernmentof Norrath,isfightingawaroftraderestrictionsthatnogovernmenthaseverwon.

¹⁹ElizabethKolbert(2001)givesafascinatingoverviewoftheeconomyofUO.Thatwor ldhasapparently experienceditsshareofhyperinflations, hoarding, landshortages, and massprotest. Thein -gameeconomy ofUOseemsmoredevelopedalso;avatarsinUOhavemoreopportunitiestosimplybemerchantsand craftmakers, whereas in Everquest there is a much heavier emphasis on hunting. (See www.geocities.com/faramir uo/forsomethoughtsonUO'seconomybyScottSalmon,along -timeplayer.) AvatarsinUOcanbuildandownhouses, and it is possible to buy and sell these houses on line at Ebay(ElectronicArtshasnottriedtosuppressdollar -basedtradingofUOitems). Theonefeature that weakens UOasacompetitortogameslikeEverquestisitsvisualperspective,whichis3 rdperson,not1 st.InUO, youseeyouravatardoingthings; in Everquest, youseethingshappenthourghtheeyesofyouravatar. Nonetheless, the UO economy is sorich that it is well worthy of a study of its own.

²⁰Lesttherebeanydoubtaboutthe"seriousness"ofthe entireenterprisehere,Icanreporthatoftheover 3,000responsestotheNES,onlyonewasidentifiablyfrivolous.WhenIpublicizedthesurvey,Ireceived dozensofemails,makingvariouseconomicpolicysuggestionsandcommendingmeforundertaking the project.ThereaderwhodoubtstherealeconomicvalueofitemscreatedintheNorratheconomy,andhence theutilityconcernsofthepeoplewhospendtimethere,isinvitedtogotoNorrath,stealsomething,and observereactions.

²¹Yee'sstudy(Yee, 2001)alsousedaninternetsurvey.Accordingtohisreport,thedemographicsofhis sampleseemrepresentativeofthegame'spopulationdata,whichhehasobtainedfromVerant.Ihavenot madeanefforttoobtainofficialdatafromVerant,preferringinst eadtoprotecttheindependenceofthe reportanditsconclusions.

²²Recently, Veranthasallowedsomecharactertransfersacrossservers, forafee. Therefugeeavatarloses allofhercashandequipment, however. Todate, avatartransferhasnothadano ticeable impact on the world.

 $\label{eq:23} Itookpopulation counts at various times from Mayto August 2001, then regressed the count on the time of the day and day of the week. The fitted value of this regression at the mean hour (assigning 1/4 to each of four six -hourspans) and day (assigning 1/7 to each day) is 60, 381. In essence this is the average population after removing cyclical weekly and hourly fluctuations. The raw average over my observations is 56, 682 (N=48).$

²⁴ThefiguresinTables1 -3arenotseriou slyaffectedbyweightsinanycase.

²⁵See <u>www.census.gov/prod/2001pubs/statab/sec14.pdf</u>.91percentoftherespondentstotheNESare35or younger.

²⁶Sincemonstersoftenspawnatthe sameplaceintheworldoverandover, anavatarcansimplywait nearbyandkillthemonstereverytimeitreappears. Aptly, this practice is referred to not ashunting but as farming. The problem with merchant biot prices is that they offer only alittle more money for very useful magicitems than they do for useless loot items.

²⁷Manyrespondentstookthistobeanobviousand,ultimately,stupidquestion.Atypicalresponsewas "ECTunnel –duh."Ofcoursetheyoverlookedthefactthatthenextrespond ent,playingonadifferent server,wasresponding"GreaterFaydark –duh."Oneinfersthatthemainmarketzoneisaverypowerfully establishedfocalpointontheservers,inthat theappendix.

²⁸Theotherfourserversareplayer -killerservers, where, because of the frequency of murder and robbery, property rights are feeble. Predictably, markets on the seservers are poorly developed.
 ²⁹Toprotect the innocent, I have not recorded the identiti esofany individuals involved in such activities

²⁹Toprotecttheinnocent,Ihavenotrecordedtheidentiti esofanyindividualsinvolvedinsuchactivities, andIwillnotrevealthesourcesofthesedata.Mydirectsurveyofusers,theNES,didnotobtainany informationregardingtheuser'sparticipationinblackmarkets.Theinterestedreadershouldhaveli ttle difficulty,asIdid,infindingopenmarketsforNorrathiangoods.

³⁰SeePatrizio,2001.

 ${}^{31} The meeting place is typically shady, such as an abandoned building. This is a black market, after all.$

³²Thestandardsforjudginganauctionas"successfully completed"wereasfollows.Iftherewasmorethan onebid,Iassumedtheauctionhadgeneratedatransaction.Iftherewerenobids,Iassumedithadnot.If therewasonlyonebid,Iassumeditreflectedatransactiononlyiftheauctionwaslistedasa "BuyItNow" ora "FirstBidWins" auction.Ofcourse,theresearchercannotknowwhetheratransactionactuallytook place.NESsurveydataandanecdotalevidencesuggestthatrealtransactionsoccur.Theauthorpersonally knowssomeonewhoboughtanite matauctionandsuccessfullycollecteditmomentslaterinNorrath.
